## **7. Features of organizing educational activities for persons with limited health capabilities and disabilities**

Persons with limited health capabilities (LHC) and disabilities have the opportunity to move freely from one educational and laboratory building to another, go up to all floors of educational and laboratory buildings, and study in classrooms and other premises, taking into account the peculiarities of their psychophysical development and health status.

For teaching persons with LHC and disabilities with musculoskeletal disorders, conditions for unhindered access to all educational premises are provided. Information on special conditions created for students with LHC and disabilities is posted on the university's website [www.kgeu.ru](http://www.kgeu.ru). There is a possibility of providing technical assistance by an assistant, as well as the services of sign language interpreters and typhlosurd interpreters.

For adaptation to perception by persons with LHC and disabilities with hearing impairments of reference, educational material on the discipline, the following conditions are provided:

- for better orientation in the classroom, alert signals about the beginning and end of the class are used (the word "bell" is written on the board);
- the attention of a hearing-impaired student is attracted by the teacher with a gesture (a hand is placed on the shoulder, a gentle pat is given);
- when talking with the student, the teacher looks at them, speaks clearly, in short sentences, providing the opportunity for lip reading.

Compensation for difficulties in speech and intellectual development of hearing-impaired students is carried out by:

- using diagrams, drawings, computer presentations with hyperlinks commenting on individual components of the image;
- regularly applying exercises for graphical highlighting of essential features of objects and phenomena;
- providing the student with the opportunity to receive targeted consultation via email as needed.

For adaptation to perception by persons with LHC and disabilities with visual impairments of reference, educational, and informational material provided for by the educational program in the chosen field of study, the following conditions are provided:

- the official website on the Internet is adapted considering the special needs of visually impaired persons, ensuring the availability of large-print reference information about the schedule of training sessions;
- the teacher, and his/her interlocutor (if necessary), present at the class, are introduced to the students, each time naming the person the teacher is addressing;
- actions, gestures, and movements of the teacher are briefly and clearly commented on;
- printed information is provided in large font (from 18 points), fully voiced;
- the necessary level of illumination of the premises is ensured;
- the opportunity to use computers during classes and the right to record explanations on a dictaphone (at the request of students) is provided.

The form of ongoing monitoring and interim assessment for students with LHC and disabilities is determined by the teacher in accordance with the curriculum. If necessary, a student with LHC or a disability, considering their individual psychophysical characteristics, is given the opportunity to pass the interim assessment orally, in writing on paper, in writing on a computer, in the form of testing, etc., or additional time is provided to prepare an answer.

## 8. Methodological Recommendations for Teachers on Organizing Educational Work with Students.

Methodological support for the process of educating students is one of the determining factors of high-quality education. A university teacher, demonstrating high professionalism, erudition, a clear civic stance, self-discipline, and a creative approach to solving professional tasks, contributes to the formation of a harmonious personality during the educational process.

When implementing the discipline, the teacher can use the following methods of educational work:

- methods of forming personality consciousness (conversation, dispute, suggestion, instruction, control, explanation, example, self-control, story, advice, persuasion, etc.);
- methods of organizing activities and forming behavioral experience (assignment, public opinion, pedagogical requirement, commission, habituation, creating educational situations, training, exercise, etc.);
- methods of motivating activity and behavior (approval, encouragement of social activity, reprimand, creating situations of success, creating situations for emotional and moral experiences, competition, etc.)

When implementing the discipline, the teacher must consider the following areas of educational activity:

### *Civic and Patriotic Education:*

- formation of students' holistic worldview, Russian identity, respect for their family, society, state, for the spiritual, moral and socio-cultural values accepted in

the family and society, for national, cultural and historical heritage, formation of the desire for its preservation and development;

- formation of students' active civic position, based on traditional cultural, spiritual and moral values of Russian society, to increase the ability to responsibly exercise their constitutional rights and duties;

- development of legal and political culture of students, expansion of constructive participation in decision-making affecting their rights and interests, including in various forms of self-organization, self-government, socially significant activities;

- formation of motives, moral and meaningful attitudes of the individual, allowing to resist extremism, xenophobia, discrimination on social, religious, racial, national grounds, interethnic and interfaith intolerance, and other negative social phenomena.

#### *Spiritual and Moral Education:*

- fostering a sense of dignity, honor and honesty, conscientiousness, respect for parents, teachers, and the elderly;

- formation of principles of collectivism and solidarity, a spirit of mercy and compassion, the habit of caring for people in difficult life situations;

- formation of solidarity and a sense of social responsibility towards people with limited health capabilities, overcoming psychological barriers towards people with limited health capabilities;

- formation of an emotionally rich and spiritually elevated attitude towards the world, the ability and skill to convey one's aesthetic experience to others.

#### *Cultural and Educational Activities:*

- formation of an aesthetic picture of the world;

- formation of respect for the cultural values of one's native city, region, country;

- increasing the cognitive activity of students.

#### *Scientific and Educational Education:*

- formation of students' scientific worldview;

- formation of the ability to acquire knowledge;

- formation of skills in analyzing and synthesizing information, including in the professional field.

- b) opening a personal account in a bank
- c) acting as a plaintiff or defendant in court
- d) its state registration

10. A will is:

- a) a unilateral transaction
- b) a bilateral transaction
- c) a multilateral transaction
- d) not a transaction, but a contract

### **Practical tasks.**

1. Based on Article 2 of the Civil Code of the Russian Federation, create a diagram titled "Relations Regulated by Civil Law."

2. Create a table titled "Classification of Legal Entities" based on the following criteria: ownership forms, business objectives, scope of property rights, formation procedures, and founding documents.

### **Examples of legal case-tasks:**

1. Stepanov, driving a car by proxy, hit Yusupov, who was crossing the roadway, as a result of which the latter received medium-term injuries and was taken

to the hospital. After recovery, Yusupov filed a civil claim against the owner of the property for compensation for material and moral damage. What decision will the court make?

2. Alekseyeva ordered a dress from a tailor. Due to the illness of the dressmaker, the dress fitting was postponed several times. When the fitting took place, it turned out that the dress could be made 1 month later than the deadline specified in the contract. In addition, due to a mistake by the dressmaker, the material was cut according to a different style than the one specified in the order. Alekseeva demanded the termination of the contract and compensation for damages. The atelier believes that it can fulfill the order and has offered Alekseeva the option of having the dress made from their high-quality fabric. Alekseeva has filed a lawsuit in court. How should the case be resolved?

3. Neighbors Ilyushin and Kozlov, who were building houses next to each other, agreed to help each other with the purchase and delivery of building materials, with Ilyushin agreeing to buy and deliver bricks and Kozlov agreeing to buy and deliver logs. They entered into a barter agreement. The exchange of building materials was equal in value. However, the delivery of bricks was significantly more expensive than the delivery of logs. As a result, Ilyushin demanded that Kozlov reimburse these expenses. Kozlov refused. Who is right, and why? What should the parties do if the exchanged goods are not equal in value?

4. The machine-building plant supplied the transformer plant with two bridge cranes (without a coupling device). The buyer requested that the cranes be completed, but due to technical reasons and the order of the head of the West Siberian Railway to limit the transportation of heavy cargo on the northern railways, the supplier shipped the missing parts after the delivery deadline had passed. Until they arrived, the buyer was unable to use the cranes, resulting in losses due to the downtime of production units. What claims can the buyer make, and are they subject to satisfaction?
